

EASYDOCS; DOCUMENT MANAGEMENT

Vehicles aren't filing cabinets; electronic in-cab solutions are here to manage your documents

Transport operators and drivers need to keep up-to-date copies of key documents in their vehicles. Firstly for productivity and business reasons such as contact lists or company policies. Secondly, for compliance and safety reasons such as Work Health and Safety procedures.

You're able to manage what documents are available in each truck directly from your office. This means there are huge process and efficiency savings to be gained by using an electronic document management tool. Your drivers will always have the required documents at hand, without fear of losing them. Administrative staff are able to forward updated documents in real time.

Easydocs is an electronic document management platform that improves communication between office staff and drivers. It's easy to use and ensures the right documentation is always at hand when required.

Easydocs features and benefits

- Upload and distribute documents through a simple to use platform.
- Electronic documents are available at all times without the need for drivers to carry large folders of paperwork.
- Fleet operators can easily manage and distribute documents.
- Helps your business remain compliant with documentation requirements.
- Improves communication channels between drivers, fleet managers and administrative staff.
- Drivers can access documents wherever and whenever they require them directly from the in-vehicle device.
- Documents are available even when outside of cellular network range.
- Fleet managers and administrative staff can easily distribute documents.
- Documents are organised into folders and easy to find when required.
- Drivers are alerted when new documents are available.
